

EAT, PLAY, THRIVE

AN ONLINE LIFESTYLE PROGRAM

A little self-care can bring health, happiness and growth. But establishing a regular routine so that these practices are consistent can be hard. This 12-week program is thoughtfully designed to give you the best working plan for your personal success. We will work together to identify your personal vision and establish health priorities in one or more areas including fitness, weight, nutrition, stress management and self-limiting beliefs and behaviors. You will learn how to initiate lifestyle change by introducing a long-term plan that avoids the "quick fix" approach. Let this be a New Year of better health!
